Hello Professor,
This is Amy BAILON B00812728.
I am having difficulty getting my full website shown on the Github site so i thought it would be best to submit my final project as a file and include all the original code. I have attempted to publish the site on Github, however, my pictures are not shown on the server as they are when I open the files on my computer. You can view the links to my GitHub here:

My Profile: https://ayethereee.github.io/-my-profile/
Landing Page: https://github.com/ayethereee/landing

In case it doesn't work, you also have the file copies, which I submitted in the file submission in Lewagon. Thanks so much!
Thank you so much,
Amy Bailon
